

DISC STAKKA™

CD & DVD MANAGER

The Disc Stakka CD & DVD Manager is an automated carousel that gives you a simple and efficient way to manage and protect your disc library, large or small.

STORE, PROTECT AND MANAGE YOUR DISCS

Each unit stores and protects up to 100 CDs, DVDs, music and game discs, and links to your computer via USB* for data and power. Disc Stakka is managed using the bundled OpdiTracker software, which provides you with "virtually online" access to your discs and their content. OpdiTracker allows you to search its database by title, keyword, filename and more to find and eject any disc within seconds. Perfect for businesses, studios and home use, with Disc Stakka you need never waste time searching for a disc again. Disc Stakka means productive disc and content management!

SIMPLE EXPANSION

Your first Disc Stakka unit holds up to 100 discs, and links to your computer via a single USB connection that supplies both power and data.*

Built-in connectors allow you to stack units up to five high to create a tower that holds up to 500 discs without needing additional cables or desk space.

Over 100 of these towers can be linked via powered USB hubs to store, manage and protect more than 50,000 discs from a single computer.

The intuitive OpdiTracker software automatically recognises new units as they are added to the system, making management of your entire disc library a breeze.

BE BETTER ORGANISED

Save space and reduce clutter. Tired of having all your discs strewn across your desk in disorganised piles? Disc Stakka gives you an efficient way of storing all your discs in one place. Disc Stakka keeps your desk clean of clutter.

BE MORE SECURE

Control and track access to your discs. The OpdiTracker software comes with a password protection system that enables you to control access to each Disc Stakka unit. You can also capture the name of the person an ejected disc is provided to.

BE MORE PRODUCTIVE

Find discs fast. Searching through dozens of pouches or shelves looking for a particular disc can be frustrating and unproductive. With Disc Stakka and its bundled OpdiTracker software, it takes just a few seconds to locate any file and eject the disc on which it is stored.

BE BETTER PROTECTED

Protect valuable discs against loss or damage. Permanently losing precious software and data because of lost or damaged discs is a thing of the past. Disc Stakka stores all varieties of 12 cm discs, and helps to protect them from damage that can be caused by improper handling or exposure to dust and UV light.

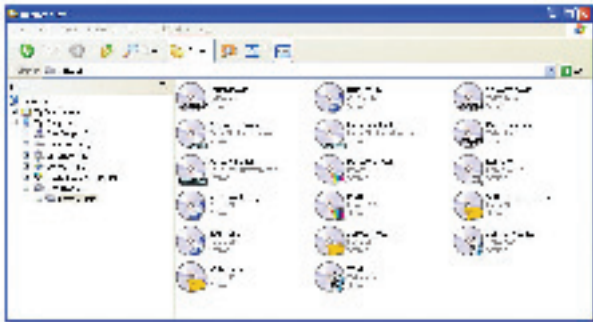

- Automated carousel stores, manages, retrieves and protects your CDs, DVDs, music and game discs.
- Disc Stakka unit holds up to 100 discs and is powered by USB.
- Fully motorized disc insert and eject mechanism helps protect valuable discs.
- Stack units 5 high to create a "tower" without additional cables or desk space.
- Link over 100 towers using powered USB hubs to manage over 50,000 discs.

- Database and search engine for managing CDs and DVDs.
- Detects any disc inserted into Disc Stakka for simple disc management.
- Automatically catalogues new discs inserted into your computer.
- Search by title, keyword, directory or file name to find and eject any disc in seconds.
- Browse to view and access your disc library graphically.

IMATION DISC STAKKA SPECIFICATIONS

MODEL NUMBER

C10

PRODUCT NUMBER

7300005832 (within Europe)

6600006636 (Elsewhere)

UNIT CAPACITY

100 x 12cm (standard size) discs

UNIT DIMENSIONS (H X W X D)

172 x 340 x 350mm (6.8 x 13.4 x 13.8in)

UNIT WEIGHT

Empty 1.8kg (4lb) - Full up to 4kg (8.8lb)

CONNECTION

USB 1.1 compatible

MINIMUM COMPUTER REQUIREMENTS

Pentium II processor or G3 processor, 32MB RAM (64MB RAM recommended), 200MB free disk space, USB 1.1 or 2.0 compliant port, CD or DVD drive for capturing data disc content

SOFTWARE REQUIREMENTS

Microsoft Internet Explorer 5.01 or above for Windows

SUPPORTED OPERATING SYSTEMS

Windows XP, Windows 2000 (SP4), Windows Me, Windows 98SE and Mac OS X v10.1 or higher

OPERATING ENVIRONMENT

In use: 5 to 35°C, 20% to 80% relative humidity, non-condensing. Not in use: -5 to 50°C, 20% to 80% relative humidity, non-condensing.

UNIT STACKING

Use built-in connectors to stack units up to 5 high to create a tower that holds up to 500 discs. Over 100 of these towers can be linked via powered USB hubs to manage more than 50,000 discs from the one computer.

POWER SOURCE

USB 1.1 or 2.0 compliant port. A single USB connection will supply power to a tower of up to 5 Disc Stakka units.

WARRANTY AND SUPPORT

1 year hardware replacement warranty. Support Monday to Friday during business hours.

PRODUCT CERTIFICATIONS

CE, FCC class B, C-Tick, VCCI and UL

*Power supply via USB if your computer USB port complies with USB standard 1.1 or 2.0. If the computer has a USB port that is not compliant, a powered USB hub may be required to supply sufficient power to operate the Disc Stakka unit.
