

Computer Technology Review®

THE STANDARD OF EXCELLENCE FOR STORAGE TECHNOLOGY INFORMATION

Best of the Best in 2003

Compatible with Ultrium/LTO generation 2 drives, Imation Ultrium 2 Cartridges provide up to 400GB compressed capacity and up to 80MB/s transfer rate. Durability enabled by Imation dual-layer media using next generation Metal Particulate (MP3) media formulation. Enterprise-class testing ensures uncompromising reliability and out-of-the-box performance.

Imation Ultrium Generation 2 Tape Cartridges also feature innovative and patented technologies that make Imation's cartridge robust, including:

▶ **Durable cartridge construction:** Rugged cartridge construction,

Limited Lifetime Warranty

providing extra protection to data if a cartridge is dropped or mishandled.

▶ **Patented three-piece tape spool design:** Delivers improved tape handling for better tracking and fewer errors.

▶ **Imation patented corner snap:** Improves cartridge strength by keeping the leader pin in place and the cartridge tightly closed in the event of mishandling or shipping disruption.

▶ **Imation expert servo-writing:** Enables state-of-the-art tracking performance that delivers stronger data security.
